in Sadnan Nafis 📄 SNaf1

RESEARCH INTERESTS

- AI for Software Engineering (AI4SE)
- Large Language Models for Code
- Automated Software Testing & Debugging
- Vulnerability Detection & Code Security
- Code Reasoning Models
- LLM Training & Evaluation
- Trustworthy & Reliable AI Systems
- Robustness of ML Systems

EDUCATION

BRAC University Sept 2021 – Sept 2025
Bachelor of Science in Computer Science Engineering
◦ **CGPA:** 3.96/4.0

A'Levels Completed 2020
Earth House Alternative School, Dhaka
◦ 1A* and 2A

O'Levels Completed 2018
Happy Times International School, Dhaka
◦ 5A*, 2As, and 1B

WORK EXPERIENCE

Full Stack AI Developer Dhaka, Bangladesh
RemoteIntegrity LLC May 2026 – Present

- Develop and maintain full-stack web and mobile applications using React.js, React Native, Node.js, Express.js, and MongoDB.
- Architect and integrate AI-driven features, including Retrieval-Augmented Generation (RAG), conversational agents, and LLM-powered automation workflows.
- Design scalable backend services and APIs connecting user-facing applications with databases, external platforms, and AI infrastructure.

AI Implementation Engineer Dhaka, Bangladesh
Privacce Labs LLC October 2025 – April 2026

- Led development of a production-grade legal RAG system, translating product requirements into deployable AI services.
- Implemented document ingestion, embedding, retrieval, and LLM-powered response pipelines for legal knowledge workflows.
- Conducted systematic testing, evaluation, and iterative refinement of retrieval and generation components, increasing usable response accuracy from approximately 45% to over 90%.

Teaching Assistant Dhaka, Bangladesh
Department of Computer Science and Engineering, BRAC University June 2024 – June 2025

- Conducted weekly consultation sessions and laboratory instruction for Object-Oriented Programming and Electronics Circuit courses.
- Graded assignments, evaluated student performance, and provided individualized academic support.
- Assisted with viva assessments and administration of final laboratory examinations.

PROJECTS & RESEARCH

ASTRA: Automated Software Test Repair and Analysis [↗](#)

- Designed an LLM-based framework to automatically generate and repair Python unit tests, improving test quality through a self-healing repair loop driven by execution feedback and error tracebacks.

Wine Quality Prediction [↗](#)

- Implemented ML models to predict wine quality (regression) and classify it as high/low quality (classification) after data preprocessing and scaling.

Bilingual RAG System [↗](#)

- Built a bilingual RAG system to answer Bengali literature questions, enabling accurate retrieval and generation across English and Bengali.

AI Smart Feedback System [↗](#)

- Built a full-stack AI-powered feedback system using Next.js, Prisma, and MongoDB, with LLM-based classification, ticket workflows, and dashboard analytics for managing and routing user feedback.

University Student Hub [↗](#)

- Engineered a comprehensive MERN-stack application to centralise academic and social resources, featuring secure authentication and a RESTful API.

ACHIEVEMENTS

Merit-Based Scholarship: Received a 75% tuition fee waiver at BRAC University based on academic merit.

VC's List: Placed on the Vice Chancellor's List for 10 semesters in recognition of achieving a GPA between 3.90 and 4.00.

The Daily Star Award: Honored by *The Daily Star* for exceptional academic performance in O-Level examinations.

STANDARDIZED TEST SCORES

IELTS Academic — Overall Band 8.0 (Listening 9.0, Reading 9.0, Writing 7.0, Speaking 7.0)

EXTRA-CURRICULAR ACTIVITIES

BRAC University Intra Junior Programming Contest 2022: Ranked 36th out of 187 teams.

BRAC University Computer Club – Event Management Team: Helped organize meetings, managed event logistics, and volunteered in workshops.

TECHNICAL SKILLS

Programming Languages: Python, C++, C, Java

Web Development: HTML, CSS, JavaScript, Django, MERN Stack.

ML Libraries: PyTorch, Pandas, Matplotlib, NumPy, Scikitlearn

Others: Git, Unreal Engine, FastAPI, LangChain
